DETAILED ACTION

Acknowledgements

1. Claims 1-17 have been canceled. Claim 18-20 have been amended. Claims 26-30 have been added. It is noted that claim 26 was previously renumbered to 25 due to the misnumbered problem. Therefore, only claim 25 has been canceled and claim 26 is new.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 6/7/2006 was filed after the mailing date of the Amendment on 6/6/2006. The submission is in compliance with the provisions of 37 CFR 1.97. However, a few references have not been considered due to being lack of translation and hard copies. Accordingly, the information disclosure statement is being partially considered by the examiner.

Drawings

3. The drawings were received on 6/6/2006. These drawings are Figures 3-5. However, the drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) and (5) because the reference "49" of Figure 5 has been replaced by reference "53" which is not found supported anywhere in the specification and reference character "19" has been used to designate both **active region** (line 9, page 7) and **quantum levels** (line 20, page 7).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing

sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: Claims 1-24 and 26-31 with the reason stated in the previous Office Action and further reason as followings:

In re Jewell et al. (US Patent No. 5719865), Jewell discloses a VCSEL with an active region 64/110 that comprises at least a quantum well and the at least quantum well includes semiconductor alloy layers InGaAs under mechanical stress and barrier layers to stabilize the mechanical stress of the semiconductor alloy layers (col. 24, lines 38 to col. 25, lines 1-20). Jewell does not disclose mechanical stabilizing layers interspersed between the semiconductor alloy layers.

In re Lo (US Patent No. 5491710), Lo discloses also discloses using barrier layers to compensate the strained quantum wells and form as pairs with quantum well layers (see the abstract).
